Date 2001 - Theoretical and practical course on Geopatie and Geobiology, "Reliefs, prevention and protection "

- CESARCH Study Centre of the Architects Registration Board (Rome, Italy)

Date 2002 - 120 hours Postgraduate Course: “The eco-sustainable project – materials and techniques”

Professional Skills

1. Architectural design, interior design, wellness centre design, landscape design
2. Contract design management
3. Customized projects consultant
4. Site Supervisor
5. Team manager
6. Energy Performance Certificate (EPC) – assessment and advice
7. Building Survey – Bill of quantity - Statement of work
8. Residential survey & valuation

Creative and artistic skills

9. Conservatory Level 3 pianist
10. Watercolour painting - tempera - wall decoration painting - fresco painting - false marble

Management and Leadership Experience

Between 1990 and 1992 I was responsible for the work carried out on projects at various residential and commercial sites, overseeing the work of typically 30 to 50 employees.

Throughout my career I have managed the labourers and craftsmen working on projects from the pre-assembly stage through to completion of the work.

I have managed the design of installations and supervised their execution on-site. I have managed customer contacts, briefings, meetings and I have managed the selection, delivery and use of supplies.

I taught at the Academy of Arts and New Technologies in Rome for ten years as teacher in charge of the course in Interior Design – Architectural Surveying – History and Style of Furniture – The Eco-Friendly Home – Landscape Design.

From 2013 to 2014 I taught the Master's Degree in Eco-Friendly Design at the Department of Architecture at Roma Tre University.

Personal statement

Past and present work experience

Immediately after gaining my degree I collaborated with various design studios that were working in the United Arab Emirates. This gave me the opportunity to develop my skills in all aspects of interior design – colour perspectives, colour schemes, layout studies, choice of materials, fabric, drapery, coatings and so on. Subsequently I undertook a partnership with Castelli Gattinara Studio in Rome, where I worked steadily for several years developing interior design projects, and acted as site supervisor throughout the length and breadth of Italy.

During the course of my professional life I have often taken on the role of technical co-ordinator for design companies at both national and international levels, being responsible for the planning and executive processes of architectural projects from their preliminary stages to their final completion.

From 1989 to 1992, besides working on a range of architectural projects, I also collaborated with Shipyard Gari S.p.A. in the interior design of two luxury yachts which were exhibited at the Nautical Salon in Dusseldorf.

In 1992 I opened my first personal studio which dealt with many projects both in Italy and abroad. In this same period I accomplished several projects for luxury residences on the island of Cavallo (Corsica), which I followed through to the actual obtaining of construction permits.

In 2000 I founded the company A.U.R.E.A., a company providing eco-sustainable architectural services, and served as its President from 2000 to 2006. A.U.R.E.A. , which I formed along with four other partners, won second prize in the 'Giubileo 2000' competition, thereby gaining financial support from Rome City Council.

I have acquired relevant experience in the field of environmental monitoring (environmental measurement of electrosmog, radon, and air quality, for the evaluation of levels of exposure for the general population and workers, in accordance with European standards).

I am currently a member of the "Sustainable Design and Energy Saving Department " of the Professional Association of Registered Architects (PPC of Rome and Province) and I have taught in relation to this subject in events organized by the Department.

Training – Speeches

Past and present public speeches and conferences

- **Legislazione Tecnica – Rome and District (2014-2015)**
Workshop for Qualifying training course : "Energy Performance Certification for Buildings"
